

COMMUNITIES LATIN AMERICA

LEARN WITH STORK

In 2021 we created a learning strategy called APRENDE CON STORK (Learn with Stork), which seeks to promote values, environment, and rights and duties knowledge, for those who represent the future and the new ideas. Through a practical and playful learning methodology involving arts, games, music, and experimentation, we want that children from our influence areas learn about three fundamental axes:

- **Be citizens:** In this specific axis, we develop topics related to equity and inclusion, rights and duties, integrity, and values.
- **My relationship with the environment:** In this axis, we developed thematic modules about environmental protection, biosafety, and self-care.
- **My relationship with others:** In this axis, we developed thematic modules about environmental protection, biosafety, and self-care

More than 500 children are participating in the workshops, which include crucial topics for their learning and growth:

- Learning is fun
- I learn to be better
- I learn through experience
- I learn to improve my environment

COMMUNITY LEADERS SCHOOL

During 2021 we launched an education initiative for the community leaders in our influence areas.

The purpose of this school was to develop and strengthen the community management capacity of the internal and external leaders of the area of influence, through information and knowledge that allows them to develop inter-institutional management within the short, medium and long term.

Divided in two phases, the program includes the chapters:

- Be a citizen
- How to manage
- City Management
- Social projects management
- Social Challenge

The Program involved more than 60 leaders during 2021 and is going for more than 200 community leaders in the activities scheduled for 2022.

People and authorities from the influence regions have appreciated our contribution for their development and ask Stork for continuing inviting them to our workshops and trainings.
