ANALYSING OUR GENDER PAY GAP
The analysis of our gender pay gap figures tell us that Stork’s workforce consists of:

- 92% male and 8% female employees.
- More males than females – 92% of our employees are male and 8% of our employees are female.
- A greater number of males in technical roles and more females in support roles; typically technical roles attract a higher salary than support roles.
- More males in senior positions within the company; senior roles attract a higher salary and other incentives.

“This profile reflects industry demographics within the oil and gas sector, where the overwhelming predominance of men in the offshore workforce is a significant influencing factor in Stork’s gender pay gap.”
