## Stork Technical Services awarded major project by Gasunie

**Stork Technical Services has been awarded an order by Nederlandse Gasunie N.V. for the multidisciplinary 'Capacity increase East-West' project. This project has recently started and will continue until the end of 2013. It will result in a significant capacity increase in the gas transport system in The Netherlands.**

In brief this Dutch project consists of 3 components: an increase in compressor capacity at the Grijskerk location, modification of the IJsselmeer pipelines at a number of locations around the IJsselmeer, and adding the Veluwe pipeline to Gasunie's gas circulation system.

"Stork Technical Services has many years of experience in successfully carrying out projects for Gasunie, and was awarded this contract on the basis of a detailed proposal and a proven technical track record", said David Bartmann, project leader at Gasunie, "This project is another good example of the 'ONE Stork' strategy, under which a number of Stork Technical Services Business Lines are involved. These include Piping & Mechanical services, Electrical & Instrumentation services and Sales & Rental services".

One of the ways in which Stork Technical Services distinguishes itself from other parties is the fact that all these activities are available from a single group, which gives customers the benefit of a single point of contact and ensures optimal coordination of all the project activities.

### About Stork Technical Services

Stork Technical Services, a wholly owned subsidiary of Stork B.V., is a global provider of knowledge-based Asset Integrity Management services for the Oil & Gas, Power and Chemical sectors. From concept through to execution - Stork Technical Services aims to help reduce risk, assure safety and improve environmental performance for our customers.

With 14,300 employees worldwide (UK & Africa, Continental Europe, Middle East, Asia-Pacific), we provide innovative solutions and integrate thinking and doing in the areas of asset integrity, consultancy, maintenance concepts, repair, renovation, new construction, relocations, subsea services and other related complex projects.
