*'How can you simply and clearly show what maintenance management is'*

## **Stork Technical Services wins prestigious Maintenance Awareness Award 2012!**

**Stork Technical Services has won the prestigious Maintenance Awareness Award 2012. The award was presented on Wednesday 10 October 2012 by Professor Dr. Henk Akkermans of DIWCM, the Dutch Institute for World Class Maintenance. Receiving the award, together with a cheque for the cash prize of € 2,500.-, on behalf of Stork Technical Services was Hans Minnaard.**

Stork Technical Services won this award for the 'Den Ooievaar' ('The Stork') project - a Maintenance Management Game which is provided in physical form to both companies and students. Through a number of simulated practical cases, the game shows participants how to deal with specific situations; in other words with actual conditions encountered in everyday practice.

The DIWCM jury found the game's highly attractive 'look & feel', using a miniature steam engine, is a compelling feature that makes participants want to get involved in playing it. The fact that the game is used in both the Netherlands and Belgium was another reason for the jury to present the award to Stork

At the award presentation, Hans Minnaard said the prize money would be invested in an updated version of 'Den Ooievaar', extending the miniature steam engine with new features and simulations.
