Storks leading gearbox & maintenance insights at EUROPORT 2013

Stork Technical Services, the global provider of Asset Management Services in the Oil & Gas, Chemical and Power industries attends the world's leading maritime event, EUROPORT 2013. Over 30,000 maritime professionals from more than 90 countries are present at this event in World Port Rotterdam. Stork Gears & Services showcases its latest gearbox maintenance & diagnostic insights.

Visitors will discover the ins & outs of our break-through contribution to the TSHD Hopper Dredger "Causeway project". The Stork Gears & Services team designed, engineered and fabricated a twin-in/single out sand pump gearbox which is switchable between both low and high gear for an optimal dredge pump performance.

Live videoscopic-analysis demonstrations will be given. This method significantly speeds up gearbox inspections. The resulting reduced downtime means the gearbox system is quickly up and running again. The videoscopic probe tool used by our diagnostic services department, is specifically designed to inspect difficult to reach environments. Meet our diagnostic services team for the latest vibration, torque and infrared and geometric measurement methods.

Stork Gears & Services is a brand independent, world class solutions provider for gearboxes, delivering a customer centered service with unrivalled speed for Oil & Gas, Chemicals, Power, Marine and Wind industry. We offer a Full Service package, from on-site services like inspections, maintenance and commissioning, right up to gearbox repair, manufacturing of gears and gearbox components. Working to the tightest deadlines, all types of gearboxes and drives can be repaired.

Meet our team for the latest gearbox design & engineering, fabrication, service and repair capabilities at Europort 2013 (ends 8 Nov.), Rotterdam Ahoy, booth 7303.

About Stork Technical Services

Stork Technical Services is an international provider of knowledge-based Asset Integrity Management services for the Oil & Gas, Power and Chemical sectors. From concept through to execution - Stork Technical Services aims to reduce risk, assure safety and improve environmental performance for our customers. With over 185 years of experience and 14,500 employees worldwide (UK & Africa, North and South America, Continental Europe, Middle East, Asia-Pacific), we provide innovative solutions and integrate thinking and doing in the areas of asset integrity, consultancy, maintenance concepts, repair, renovation, new construction, relocations, subsea services and other related complex projects.
