

TURBO BLADING

HIGH QUALITY BLADES DELIVERED WITH
UNRIVALLED SPEED FOR THE AFTERMARKET
OF TURBO MACHINERY INDUSTRY.

ASSET INTEGRITY PARTNER

STORK

HIGH QUALITY BLADES

STORK IS A WORLD CLASS ASSET INTEGRITY MANAGEMENT COMPANY DEDICATED TO HELPING OUR CLIENTS DELIVER ENHANCED PERFORMANCE IN THE OIL & GAS, CHEMICAL, POWER AND OTHER MAJOR INDUSTRIES.

From concept through to execution, we help our customers to maximise profitability, reduce risk, assure safety and improve their environmental performance. With 16.500 employees worldwide, we provide innovative solutions by integrating both thinking and doing in the areas of asset integrity, engineering, construction, maintenance, repair, relocations, consultancy and other related service areas.

Blades and special components for turbo machinery are the heart of our company. With over seventy years of experience we support and assist our customers with advanced engineering, production and quality expertise. Through optimal application of technology and proven expertise, Stork is unmatched in our abilities to produce the highest quality blades in shortest turnarounds with competitive prices.

Our unique combination of expertise and experience – underpinned by a proven portfolio of inspection, engineering, repair, maintenance, modification and construction services – enable us to not only offer major costs benefits, but to also provide dedicated support across all business critical components and throughout the asset lifecycle.

KEY SERVICES

A wide range of blades

Stork's experience, modern manufacturing facility and extensive material inventory results in uncompromising speed in delivery. With our innovative stocking-program of a wide range of gas turbine compressor blades we have established a virtually immediate availability. Whether you're faced with a planned or forced outage, Stork will put you back on-line quickly – with minimum downtime.

One Stop Shop concept

With our One Stop Shop concept we can offer you a wide range of services for your turbo machinery through internal and external specialists but with the benefit of one face and only one legal entity.

Quick quote service

To further minimise downtime we have developed a quick quote service. Please contact us to learn how we can help you on info.turboblading@stork.com or call us on +31 (0)88 089 1290.

Digitalisation service

In case you have definite requirements for your turbo machinery in the near future, we offer you a free digitalisation service. This service can be executed in our shop through state-of-the-art CMM measuring machines or on-site (if no sample blades are available) through an optical 3D scanning technology.

High technology facilities

By means of our modern engineering and production facilities, Stork is able to meet the ever-increasing demands of our customers. Our professional and flexible organisation, in combination with the latest CAD/CAM systems, over 65 state-of-the-art 4- and 5 axis milling machines and measurement technology, we are able to give our customers any reliable source for virtually any requirement.

Dedicated service resources

Blades, virtually not limited on size, are manufactured from a wide variety of raw materials from our large in-house inventory, new image including, stainless, titanium and other alloys.

Engineering capabilities

As a technology driven company, Stork is constantly developing and improving its processes. In the area of engineering we continually invest in systems such as CAD/CAM to achieve continued improvement of our process and the quality of the services we offer.

Quality assurance

Our dedication of accuracy is exemplified by incorporating every aspect of the manufacturing process. Maintaining our uncompromising benchmarks begins with destructive and non-destructive examination of all raw and finished material. Strict adherence to close tolerances is ensured by systematic, consistent and stringent inspections. Simply put, our product's quality meets or exceeds that of OEM's.

HOW WE CAN HELP YOU

OUR AIM IS TO BE YOUR ONE PARTNER; DELIVERING EXPERTISE AND CONTINUITY OF SERVICE THROUGHOUT THE ASSET LIFECYCLE.

Our specialist project teams have a broad understanding of the energy production process and in-depth process knowledge of the turbo machinery. Our certified approach to project management, an uncompromising commitment to safety, and our impressive technical capabilities combine to provide highest quality blades at the best speed possible. Our blading companies are in Sneek, the Netherlands en Ithaca NY, United States of America.

To learn how we can help you, please e-mail us on info.turboblading@stork.com.

We will be delighted to discuss how you can benefit from our experience.
