  - Special metals welding
  - Rope access services
  - Heat treatment
  - Laser alignment
  - Control systems
  - Air balance
  - Water treatment
  - Engineering services
  - Construction
  - Construction management
ASSET MANAGEMENT SOLUTIONS
Our Asset Management Solutions (AMS) team has subject matter experts and solutions in all areas of operations, maintenance, and reliability who assess Clients’ current conditions and create superior operations, maintenance, and reliability management programs. The result is excellent plant performance coupled with low total cost of ownership. Our PlantREADY™ suite of services is designed to meet the needs of brand new facilities as well as existing plants, in need of performance improvements.

IMPROVEMENT OF EXISTING ASSETS
Our team of MM&AI specialists is prepared to help improve performance of existing assets all the way to world class if desired. Starting with an assessment of current conditions using our AP Index™ assessment tool, we customize solutions using our BestPLANT™ processes to close gaps.

SUSTAINING AND CAPITAL PROJECTS
We bring a long history of combined services and knowledge to our Clients as we perform projects of all sizes.

- World-class safety program: TCIR 0.43
- Proprietary tools, processes, and procedures to support project execution
- Global procurement spend of $15.3 billion to reduce cost of material and equipment for our Clients
- Recruitment centers located across the United States for a large base of trained craft and staff

PLANT ENGINEERING SERVICES
Plant Engineering Services provides multidisciplined engineering and project management services including conceptual engineering, front-end engineering, detailed engineering, design, project controls, and estimating, with procurement, construction, turnaround, commissioning, and start-up support services as needed.

Clients receive expert project execution customized to their needs, including:

- Proven, scaled-to-fit work processes
- Streamlined management processes and structure
- Ability to respond quickly to unplanned Client needs
- Cost-competitive pricing
- High-value solution for technical requirements

Flexible execution strategies include office-based project execution, as well as site-based teams and in-plant seconded personnel.
