OUR COMMITMENT

TO THE SOUTHERN NORTH SEA

STORK

A GLOBAL BUSINESS

With over 4000 clients worldwide, Stork has been working in long term partnerships with many of the major global Exploration and Production companies for over 40 years. Stork has a global workforce of over 16,500 and locations across a number of key regions – UK & Africa, Europe, Middle East, Americas and Asia Pacific.

Stork has extended and enlarged its global footprint in the last five years. We have a long history in North Sea Oil & Gas, having worked in partnership with major Oil and Gas Operators since initial production in the 1970s. Since then, the implementation of a robust matrix organisation has enabled each of our specialist services to grow and develop, whilst ensuring we continue to deliver integrated solutions.

REACH BEYOND ZERO

Stork is dedicated to being recognized as an industry leader in HSEQ; both by our clients and industry peers. REACH Beyond Zero, our value driven HSEQ engagement programme, will help us to achieve this goal.

REACH Beyond Zero is our HSEQ vision, to activate and engage all Stork employees to challenge themselves, to think and do more to improve our HSEQ culture and performance. As an organisation we REACH Beyond Zero by functioning as one team, with shared values, driving action to transform our HSEQ culture and performance.

GLOBAL BUSINESS LOCAL PRESENCE

As a global leader in fully integrated asset integrity management services, Stork is committed to delivering safe and innovative solutions in the Southern North Sea, direct from Lowestoft.

From our newly opened operational base in Lowestoft, we will support our clients in the optimisation of their assets through the delivery of a range of maintenance, repair and modification services, including:

- Fabric Maintenance and Special Access Systems
- Scaffolding
- Machining & Bolting
- HVAC & TR Testing
- Heat Treatment
- Cathodic Protection
- Caisson Inspection
- Environmental & Decontamination

These extensive asset integrity capabilities are supported by our award-winning innovations:

- Hot Bolt Clamp
- Composite Repair
- Advanced Online Desanding
- Extended Reach Breathing Apparatus System (ERBAS)

We are uniquely positioned to support our clients throughout the asset lifecycle, on and offshore, through our unrivalled portfolio of asset integrity products, services and expertise.

Our SNS operations will be strengthened by the expertise of our other locations in the UK & Africa region, including our Aberdeen base, which has 40 years' experience in the global Oil & Gas sector.

ASSET INTEGRITY PARTNER

FABRIC MAINTENANCE & SPECIAL ACCESS SYSTEMS

Fabric Maintenance

Stork provides a range of Fabric Maintenance services; all delivered by our competent multi-skilled personnel. We package our services to suit client requirements, mobilise quickly to deliver solutions and complete the workscope within the timeframe set.

Special Access Systems

We deliver an unrivalled multi-disciplined rope access capability as a stand-alone or integrated function within a project or campaign. Our team covers all trades – including construction support and inspection – and our in-house rope access training capability is certified to IRATA standards.

Scaffolding & Tethered Equipment

Stork is the UK's largest offshore scaffolding company. We are at the forefront of technology development, continually introducing award-winning new systems and innovations to increase safety and efficiency while cutting costs.

OUR VALUES

SAFETY

Safety is a core value which underpins all of our activities worldwide. We actively engage with our employees, clients and stakeholders to provide a sustainable and safe working environment and proactive safety culture.

OPERATIONAL EXCELLENCE

We are committed to excellence. What we do is rarely easy and achieving the best outcome often requires expertise to unravel complexity. We enjoy exploring new ways of thinking with our clients.

RESPONSIVENESS

We respond rapidly to the operational needs of our clients globally. We are flexible, proactive and provide smart solutions for the long term. We continually seek to improve our response and service.

BUSINESS PRINCIPLES

We maintain the highest standards of business conduct towards our customers, business partners and employees. By putting our Business Principles into practice we contribute to a successful and sustainable future for Stork and our stakeholders.

MACHINING & BOLTING

Our dedicated machining and bolting capability manages the entire joint integrity process, from inspection through to assembly, testing and completion. We ensure reliable safe operations with fully integrated onsite machining, bolting and leak repair services.

HVAC & TR TESTING

We are a market leader in the supply of integrated Heating, Ventilation, Air Conditioning & Refrigeration (HVACR) services. Our wide service offering ranges from routine maintenance to design, installation and commissioning.

HEAT TREATMENT

Stork Cooperheat's rich heritage has allowed us to develop a range of heat treatment solutions capable of meeting harsh operating environments.

CATHODIC PROTECTION

We are recognised as the leading provider of Cathodic Protection (CP) services on and offshore. Our CP capability combines surveys, design and engineering and Impressed Current Cathodic Protection (ICCP) systems.

CAISSON INSPECTION

We provide clients with accurate, clear and valuable data on Caisson and Riser Inspections, Non-Destructive Testing, Advanced Inspection and innovations such as internal laser profiling.

ENVIRONMENTAL & DECONTAMINATION

Our Environmental and Decontamination Services division is a leading provider of a range of specialist cleaning, sand management and asbestos management services around the world.

ALWAYS INNOVATING

At Stork, we seek new opportunities to expand our product and service offering through the development of new technologies that improve the health and safety of our workforce, the business and our client's operations.

HOT BOLT CLAMP

The patented and multi-award winning Hot Bolt Clamp technology enables the safe removal and replacement of corroded bolts on live four bolted connections with no disruption to ongoing production. This reduces risk, helps assure integrity and improves the safety environment on an asset, while simultaneously reducing operating costs and optimising productivity.

COMPOSITE REPAIR

Stork launched its range of composite repair solutions in 2013 to complement its fully integrated asset integrity led portfolio. Our Composite Repair capability includes a wide range of products specifically designed to provide reliable, efficient and cost-effective repairs to piping and infrastructure components. Stork PowerSleeve and Stork AquaWrap innovations can also be used to restore structures and vessels from internal and external wall loss.

ADVANCED ONLINE DESANDING

Stork's Advanced Online Desanding (AOD) system, now in its 3rd generation, sets a new standard for sand management that's safe, environmentally friendly and cost-effective. AOD removes and cleans sand from live separators without causing undue process disturbance or production loss ready for safe overboard discharge.

EXTENDED REACH BREATHING APPARATUS SYSTEM (ERBAS)

TERBAS is designed for the quick and simple refill of empty cylinders during evacuation from a confined space, typically an FPSO or platform leg. Escape cylinders provide just 10 minutes of air, but can be challenging to replace. ERBAS overcomes this by allowing the wearer to refill their empty cylinder in just 20 seconds, using one simple High Pressure (HP) connection.
