

# TECHNICAL SPECIFICATION

## Asbestos Management

Asbestos has been the main cause of occupational ill health since the 1950s and remains the single greatest cause of work related death. In the UK alone, more than 5,000 people die every year from asbestos related disease.

The management of asbestos is one of the most heavily regulated areas of industry. Stork is fully licensed by the Health and Safety Executive to undertake work with asbestos insulation, asbestos coating and asbestos insulating board.

Stork operates in accordance with the Control of Asbestos Regulations 2012 and Associated Codes of Practice. We are unequivocal in our responsibilities for safeguarding the welfare of employees, those who work with us, and the environments in which operate. With 25 years experience, Stork has positioned itself at the forefront of the international asbestos management service market by demonstrating industry leading proficiency at managing major projects in the energy industry.

### Technical information:

Stork has a proven track record in asbestos management and our extensive capability incorporates the following services:

- Offshore decommissioning
- Destruct works
- Asbestos abatement programmes
- Asbestos sampling
- Asbestos surveying
- Use of rope access technicians

Stork is a full contracting member of the Asbestos Removal Contractors Association (ARCA) and is qualified under the ARCA Site Audit Accreditation Scheme.
