YOUR ASSET INTEGRITY MANAGEMENT AND MAINTENANCE PARTNER IN THE ASIA PACIFIC REGION
SAFETY IS OUR CORE VALUE

Stork is fully committed to ensuring all employees go home safe after each day or shift. REACH Beyond Zero will help us to achieve this goal. REACH Beyond Zero is our HSSEQ vision, to activate and engage all Stork employees to challenge themselves, to think and do more to improve our HSSEQ culture and performance.

REACH Beyond Zero is built on five core behaviours, which we seek to demonstrate at every level of our organisation.

The behaviours are:

Visibility - acting as active champions of the REACH Beyond Zero values

Authenticity - demonstrating personal commitment through action

Leadership - taking personal ownership and responsibility for HSSEQ in the workplace

Understanding - understanding our HSSEQ challenges and contributing to improvements

Engagement - feeling empowered to intervene when a situation appears unsafe

REACH Beyond Zero adds value for our clients by:

• Engaging with and positively impacting their HSSEQ culture
• Improving HSSEQ performance on their assets
• Transparent HSSEQ reporting
• Enhancing communication through sharing information, lessons learned, best practices and alerts

Giovenco Industries demonstrates a full commitment to its people and their families.

The senior management of the company strongly believes in an Incident & Injury Free (IIF) culture.

Giovenco has been awarded over the years for its excellent performance in Occupational Health, Safety and Environment.

We consistently monitor our performance and invest in training of our people to achieve best practice.

FOR MORE INFORMATION VISIT OUR WEBSITE: WWW.STORK.COM/REACHBEYONDZERO
In 2015, Stork acquired Giovenco to extend the group’s global footprint beyond asset integrity to include fabric maintenance within the Asia Pacific region.

Offering a broad spectrum of industrial services, Giovenco Industries has become one of Australia’s leading contracting companies.

The company comprises a group of specialized multi-disciplined industrial services contracting companies and was first established in 1954 by five brothers, who combined their skills gathered in their home country of Italy to operate a small sand blasting and painting business in Sydney.

From the company’s first contract at the Caltex refinery in Kurnell to the ongoing works for Chevron (via Bechtel) on the Wheatstone LNG Project, Giovenco Industries prides itself on delivering projects on time to a high quality, and most importantly, safely.

Now working as one team, with more than 1,000 employees located Australia, New Zealand and Malaysia, Stork in the Asia Pacific region is uniquely positioned to support oil and gas operators, onshore and offshore, throughout the asset lifecycle. From inspection & integrity, mechanical & piping, industrial maintenance (fabric maintenance) and tank repair, Stork delivers its services with a focus on safety, quality and cost-efficiency.

Safety is a core value. Stork’s REACH Beyond Zero HSSEQ program and Giovenco’s Giosafe initiative provide a platform at all levels of the organisation to deliver continuous improvement in safety performance.

In short, we streamline the processes that are essential for safe and effective integrated operations. And by improving efficiency, availability and profitability, we help to optimise the value of your assets whilst extending field life.

We deliver our services to the following markets:
- Oil & Gas
- LNG
- Power
- Chemical
- Mining

We have successfully completed major projects for a wide range of clients in Asia Pacific, including:
- Bechtel
- BHP Billiton
- BP
- CBI
- Chevron
- ConocoPhillips
- KBR
- Shell
- Woodside
- Worley Parsons
INDUSTRIAL MAINTENANCE SERVICES

COMPLETE INDUSTRIAL MAINTENANCE SERVICES (FABRIC MAINTENANCE) 
CAPABILITY BASED ON AN INTEGRATED, PROACTIVE APPROACH

If you value fabric maintenance as part of an integrated services contract then our proactive approach means we can meet your requirements precisely. We have a proven track record of delivering expert fabric maintenance services based on our safe and cost-effective working approach.

We support clients to identify medium to long term integrity requirements and define an optimum methodology that is unique to suit their specific asset requirements.

We have developed effective processes and work packs to manage our operations and clearly define responsibility and methodology to ensure we deliver safely, within budget and on time.

Services offered include:
- Coatings & Abrasive Blasting
- Insulation
- Fire Proofing Solutions
- Scaffolding & Access Solutions

How we add value:
- Multi-disciplined approach - Full project management from a multi-disciplined access team including planning, integrated management, engineering, inspection, maintenance, and execution through to completion
- Complete service - End-to-end insulation service including technical support, advice, and site surveys through to safe and efficient implementation
- Extensive offering - Full range of fire-proofing products and services, and an approved supplier of products from the main applicator manufacturers
- Advanced equipment - state of the art abrasive blasting and painting facility is equipped with the latest technologies and application methods
WIDE RANGE OF COST-EFFECTIVE AND EFFICIENT MECHANICAL & PIPING SERVICES

We understand the challenges that process industries face today: the need to reduce operational costs, maximise uptime, optimise maintenance efficiency and all without compromising safety.

We work closely with you to ensure asset integrity, efficiency and reliability while providing support for the total lifecycle of crucial flow and manufacturing equipment. We have capabilities covering all mechanical areas, which distinguishes us from other players in the marketplace.

With our unique combination of knowledge and experience, supported by a proven and wide-ranging services portfolio, we have the capability to deliver significant cost benefits and support for all business-critical components and processes. When needed we integrate complementary services such as rope access, scaffolding, machinery and manpower resourcing to ensure tailor-made solutions for your specific project requirements.

Services offered include:
• Heat Treatment
• Thermal Consultancy
• Controlled Bolting Services
• Onsite Machining
• Mechanical Services
• Flange Management

How we add value:
− Tailored solutions - Turnkey service for a full range of fully engineered heat treatment services and solutions
− Complete offering - Complete range of on-site machining and controlled bolting services covering the total joint integrity process
− Multi-skilled - Unrivalled range of pre-engineering support to our clients with an extensive team of highly motivated and multi-skilled in-situ machining engineers
− Flexible approach - Stork Cooperheat’s equipment provides the user with the flexibility to heat treat a range of pipe welds at the same time
INSPECTION & INTEGRITY

REDUCE FAILURES, INCREASE ASSET LIFE AND MAINTAIN THE HYDROCARBON ENVELOPE

We are a leading provider of Asset Integrity services to the global oil & gas, mining, power and chemical industries. Our integrated Assess, Inspect and Repair (AIR) approach enables us to manage asset risk and integrity throughout the life-cycle, from original plant design right through to decommissioning.

Our Inspection & Integrity services deliver active risk management; ensuring that the inspection program is relevant to the remaining asset life and focused on the safety critical elements. In turn, providing operators with the assurance that their assets can operate efficiently and safely at all times.

We implement best practices, developed from many years’ of experience in the onshore and offshore sectors. Where possible the Integrity division recommends working with Stork’s complimentary service portfolio to ensure risk based inspection programs and written schemes of examination to provide an efficient and complete service package.

Services offered include:

- Advanced Inspection
- Non Destructive Testing
- Cathodic Protection
- Corrosion Monitoring and Management
- Risk Based Inspection
- Classified Plant Inspection

How we add value:

- **One-stop-shop** - with an extensive range of inspection and testing services which allows for efficient and cost-effective project delivery
- **Integrity assured** - Optimal operational capacity and asset integrity is assured through a quality and reliable inspection regime
- **Bespoke solutions** - Turnkey or built to order cathodic protection systems based upon latest industry knowledge and extensive experience
TANK REPAIR & SHUTDOWN

BEST IN INDUSTRY TANK MAINTENANCE SOLUTIONS

We have a unique capability across all major tank maintenance disciplines including mechanical repairs and modifications, coatings and linings, insulation, and scaffold and access solutions.

This allows us to reduce project durations, provide improved and efficient coordination between disciplines and reduce management requirements.

When combined with our experienced project and contract administrative personnel, we offer solutions ensuring client satisfaction.

Services offered include:
- Project and tank asset maintenance planning
- Decommissioning
- Inspection and scoping in accordance with API
- Repairs, modifications and testing
- Hydro testing and commissioning
- End to end total tank refurbishment and certification services

How we add value:
- Consultation – we listen to our clients’ needs and work closely with them in a planned way to establish a tank inspection and maintenance regime to meet compliance and budget needs
- Innovation - we provide state of the art equipment in the remediation of storage tanks that delivers efficiencies to tank maintenance programs
- Engineering – we have the engineering capability to provide front end engineering to the tank maintenance solutions all the way through to maintenance execution, testing and recommissioning – the “One Stop Tank Maintenance Shop”
INNOVATION IS IN OUR DNA
Stork continually develops and updates its offering to include new innovative products and services that improve asset performance, reduce risk and assure safety.

Examples include:

**Hot Bolt Clamp**
The patented and multi-award winning Hot Bolt Clamp technology enables the safe removal and replacement of corroded bolts on live four bolt flanged connections with no disruption to ongoing production.

**Advanced Online Desanding (AOD)**
AOD removes sand from live separators and cleans the sand ready for safe overboard discharge. This means desanding activity can be taken out of turnaround scopes, which shorten turnaround durations and increases annual production.

**Extended Reach Breathing Apparatus System (ERBAS)**
ERBAS delivers a unique approach to safe confined space entry and exit. While traditional techniques require time consuming cylinder changes, ERBAS uses a patented quick connector that allows fast and easy refilling of cylinders in (deep) confined spaces.

**Fully Automated Camera Crawling System**
Chris Rawlinson from our WA operations won the global award for HSSEQ Innovation at Stork’s REACH Beyond Zero Annual Awards 2015 for his role in the development of a Fully Automated Camera Crawling System - the first of its kind in Australia. The crawler removes the need for technicians to conduct Industrial Radiography accessing piping via internal means, which heavily reduces the risk involved to our people and others in the field.

And more...
Other innovative Stork products & services include Specialist Caisson Inspection, Valve Diagnostics, Wireless Cathodic Protection Monitoring (Seatooth CP) and Laser Cladding.

You can find our innovation videos, brochures, client references and more at [www.stork.com/innovations](http://www.stork.com/innovations).

Our global maintenance, repair and modification services are tailored to help optimise the performance of major oil and gas assets.

We combine our front-end thinking and a problem-solving approach to innovation, with an unrivalled range of services and skills. We bring these together with a safety commitment and provide you with a complete integrated asset integrity assurance offering.
