AN ESSENTIAL PART OF YOUR SUPPLY CHAIN MANAGEMENT STRATEGY

Stork is a highly experienced global provider of inspection, expediting and quality assurance services, primarily to the Oil & Gas, Nuclear and Renewables industries.

Our Quality Services division has earned a strong, creditable reputation for delivering reliable, cost effective services on a global basis, fully in accordance with internationally recognised standards.

Stork’s highly experienced Quality Services team inspect equipment plant and manufactured products before they leave a site to fully ensure that it meets clients’ specific requirements; supporting suppliers’ supply chain management strategy. This ensures a quality product and reduces the risk of production outages, as well as subsequent threats to safety, asset integrity and legislative compliance.

Stork has developed a Quality Assurance System and procedures to control both our national and international quality inspection operators, which is independently accredited to BS EN ISO 9001 (2015), ISO 29001 and ISO 17020 Part A (in line with the power generation Industries).
What we do

With access to a global network of over 12,000 locally based, highly skilled and competent quality assurance personnel, inspectors and expeditors that can be quickly mobilised to meet your exact requirements, Stork deliver the following services right first time, on time, every time:

- Vendor/Supplier Quality Surveillance
- Mechanical Static Equipment surveillance
- Vendor/Supplier Auditing
- Drilling and Completions
- Pipe Mill Surveillance
- Portable Equipment
- Expediting
- Witness Testing
- Coating Inspection
- Expediting
- Welding Inspection
- Quality Assurance
- Nuclear Inspection (UKAS 17020 Type A accredited)
- Technical Audit
- Site Inspection/commissioning
- Manpower Support
- NDT Inspection
- Project Management
- Inspection Coordination.

Stork has undertaken inspection and expediting services in most major pipe mills throughout the world and is familiar with the plant layouts, operations and locations.

Committed to safety

Safety is our core value. At every level of our organisation, our award winning global HSEQ programme, REACH Beyond Zero, provides us with a dynamic employee-led platform for delivering continuous improvement in our safety performance. We are dedicated to reducing risk, assuring safety and reducing environmental impact.

How we add value

It is our goal to add value wherever we operate. Stork delivers by supporting you, our clients, in assuring that your equipment meets the required standards for safe operation. Some of the key benefits of partnering with Stork are:

- Proven track record and experience in a vast range of third party inspection and expediting services
- Access to a global network of inspectors and expeditors, with extensive technical knowledge and experience
- Single point of dedicated contact offering worldwide coverage, resulting in improved communication and streamlined project management
- In-house centralised database with up to date details of competences and certifications, as part of an overall quality assurance programme
- Fully accredited HSEQ management system, certified to ISO 14001 and OHSAS 18001 standards, including our award winning REACH Beyond Zero programme
- Professional documentation provided by a dedicated team of specialists, allowing access to key administrative support functions and corporate assistance
- Application of modern IT systems with full client extranet capabilities.
