

TECHNICAL SPECIFICATION

Refrigeration Maintenance & Breakdown Service

Stork's HVACR team are market leaders that supply a wide range of Refrigeration services.

We offer simple maintenance packages through to full design, upgrades and installation of Refrigeration Systems ensuring that each system is designed to meet all up to date legal requirements as stated by both HSE and FGas Regulations.

We also supply clients with complete HVACR tailored packages to suit any application including detailed reports. These cover the work completed, all necessary certification, documentation and test sheets ensuring that a history of each system is maintained from the date Stork HVACR partake in any project.

Services:
