

Strengthening Education Partnerships UK

MELDRUM ACADEMY

Stork UK have a long standing partnership with Meldrum Academy and during the course of 2021 we continued working together on in-school initiatives as well as providing guidance and support to teachers about career options for pupils, raising awareness of the various pathways available to school leavers.

During 2021 Meldrum Academy set up a mentoring programme for their S6 pupils. The aim of the scheme is to ultimately provide a mentor from the business partnership network for every S6 pupil in their last year of school, giving them any support and guidance needed as they prepare to leave school.

QUARRYHILL PRIMARY SCHOOL

As part of the [Developing the Young Workforce \(DYW\) Scotland](#), Stork UK have partnered with local primary school Quarryhill to help encourage interest in STEM (Science, Technology, Engineering and Mathematics).

The first of its kind between a local employer and primary school in Aberdeen, the partnership began in Q3 2021.

Several sessions have already been hosted by Stork employees. One of our Scaffold Design Engineers and Project Controls Manager talked to pupils about how they use maths within their everyday roles at work. Climate Change & the Environment was presented by our UK Environmental Advisor.

These partnerships build on our corporate responsibility commitment to develop young people in our local communities.
