WHO WE ARE

Stork, a Fluor company, is a value-driven provider of fully integrated operations, maintenance, modifications and asset integrity solutions. We partner with our clients in a range of sectors including oil and gas, chemicals and process, metals and mining, power, and manufacturing industries.

Stork Technical Services Limited is the UK entity of the global Stork Group and is largely engaged in the onshore and offshore energy and industrial industries. Regionally in the UK, Stork employs approximately 1400 people with the majority of these individuals working on offshore installations on the UK Continental Shelf as well as our onshore clients' sites.

As we safely begin our post COVID journey, we will not lose focus on our continued commitment to achieve gender balance across our organisation.

Stork is dedicated to attracting, developing and retaining a diverse workforce and has committed to deliver on the AXIS Pledge to achieve gender balance across our operations. We believe in addressing the gender balance in how we recruit, support and provide for our employees and this is a goal we are inspired to achieve. We believe diversity goes beyond gender and fully appreciate the benefits that a wide-ranging workforce brings - to our company culture, clients, communities in which we work and to our industries.

Our industry has made excellent progress towards becoming more diverse and Stork will continue to play its part to achieve Vision 2035, by attracting new talent into energy and industrial sectors, developing existing talent and providing an inclusive environment for individuals to thrive. In our report you will see that we have made progress in a number of areas and what our focus will be in 2022.

REPORTING OUR GENDER PAY GAP

It is important to distinguish between equal pay and gender pay gap.

Equal Pay means that men and women doing the same or similar work receive equal pay. Stork has long been committed to equal pay.

Gender Pay Gap is a measure of the difference between men's and women's average earnings. Gender pay gap is influenced by many factors including societal norms and industry sectors.

UNDERSTANDING THE GAP

This report relates to Stork's UK Field Personnel and operations. The snapshot date of 5th April, 2021 has been used for the basis of our Gender Pay Gap calculations. All findings have been prepared in accordance with ACAS guidance.

STORK EMPLOYEES:

The gender pay gap differs from equal pay, as it is concerned with the differences in the average pay between men and women over a period of time, regardless of their role. Equal pay deals with the pay differences between men and women who carry out the same or similar jobs.

ANALYSING OUR GENDER PAY GAP

The analysis of our gender pay gap figures tell us that Stork's workforce consists of:

99% of our field based employees are male and 1% are female.

There is an overwhelming predominance of men in field based positions.

This profile continues to reflect industry demographics within the oil and gas sector, where the overwhelming predominance of men in the offshore workforce is a significant influencing factor in Stork's gender pay gap. We are committed to taking steps to change these demographics.
